

BECA ROLLER PAST

Paste for thorough cleaning of ink rollers

Allows thorough cleaning of the ink rollers. Its studied formulation facilitates the pressman work in the quick change of color, combining the speed and cleaning in depth. Quickly removes dry ink waste from the pores of the rollers, deglazing them, without damaging them at all.

Properties

- Great resilience – regeneration power.
- Mixing of cleansers, surfactants and emulsion agents with high dissolving power.
- It does not attack the rubbers or metal parts of printing machines.
- Suitable for all types of inks.
- It delays the glaze of the rubber, giving back its surface properties.
- Increases the life of rubbers and Rollers.
- Reduces maintenance time.
- Improve productivity
- Product without VOCs.
- Very effective product, low consumption.

Instructions for use

- 1.- Wash the rollers normally with the usual cleaner.
- 2.- Blanding the roller the ink.
- 3.- Add BECAROLLER PAST and let the rollers run for 3-5 minutes without the blade.
- 4.- Apply the blade, and washing with the usual cleaner to completely eliminate the product.
