

ROLLER WASH

Intensive cleaning of the batteries

An efficient washing agent for quick ink colour change. ROLLER WASH combines speed and deep cleaning, making easier the cleaning process. It removes dry ink from the roller pore, eliminating the glaze without damaging the rollers.

Properties

- High capacity of regeneration and recovery.
- It is a compensated mixture of high solvency cleaning agents, surfactants and emulsifiers.
- Does not attack the blanket or the metallic parts of the printing machines.
- Valid for all kind of inks.
- Delays the blanket glazing.
- Makes longer the blanket and rollers life.
- Reduces the maintenance time.
- Improves the productivity.
- Non COV.
- Very effective product, low consumption.

User Instructions

1. Clean the roller with the usual cleaning roller agent.
2. Apply Roller Wash to the rollers and leave the battery working for three-five minutes, without the doctor blade.
3. Apply the doctor blade.
4. Rinse with the usual cleaning agent to remove completely the product.
